Localized
(changed functions ↔ routes, guards)
trusted manifest valid
Contracted
(security contracts)
selected tests in sandbox
Executed
(baseline, candidate, repeat)
no contract
counterfactual mutant run
Oracle judged
(does the test catch the mutant?)
contract exists
Adaptive tests
(Ollama, optional, untrusted until validated)
generated tests validated
Gates evaluated
(DecisionEngine)
obligation or oracle fails
REJECTED
all 7 gates pass
findings exist
not re-verified
Repairing
(bounded, deterministic)
re-verified in sandbox
evidence missing
ACCEPTED
Recommit ready
